WEATHER OBSERVATIONS

The northeastern storm has moved from Minnesota to the St. Lawrence valley, attended by snow or rain from the lake region and the Ohio valley to the north Atlantic coast, by gales in the lake region, and by higher temperatures in the eastern and southern sections. It remains cold, however, in the southeast, with frost extending to Tampa, Fla. An area of high pressure and much colder weather is central over the valley of the Red River of the North and temperatures slightly below zero are reported from northern Minnesota. Another high overlies mountain plateau. The eastward movement of the northern high and the approach of another low which is appearing over Alberta will be attended by fair weather in this vicinity tonight and Saturday, with rising temperature Saturday.

Weak and Strong.

There are men of strength and men of weakness. We meet them both in every walk of life. Their birth or education or general surroundings may be the same, but a notably sharp line divides those who govern their inclinations from those whose inclinations govern them. On the one side we see strength, accomplishment and value, on the other weakness, spasmodic and ill directed effort and inefficiency.
